InSite® ACID-FREE

ACID-FREE PAPER-FACED FOAMBOARD

InSite® Acid-Free was created for the high-end requirements of preservation mounting and framing and is a highly recommended solution for photographers and artists who require a backing that will help preserve their artwork for long-term display or storage.

BENEFITS:

- Offers two mounting surfaces, both free from damaging pollutants and harmful gases.
- Complies with PAT standards.
- Acid-free paper liner with pH values ranging from 7.5–9.5, buffered with a 3–5% calcium carbonate reserve.
- Liners are 100% high-alpha cellulose virgin pulp, free from ground wood and/or post-consumer materials.
- Our Reveal® foam center is engineered to be highly warp-resistant to retain its thickness during mounting.
- Available in natural white.

IDEAL FOR:

- Preservation mounting and framing
- Long-term display and storage
- Fine art and photography

STANDARD COLOR:
Natural White
