

Resilient[®] PRINT[™] is a velvety smooth, closed-cell foam board with a consistent white surface for direct digital printing.

BENEFITS:

- Spring-Back technology - returns to its original form.
- Closed cell construction – provides a smooth surface for mounting and printing.
- Velvet black core – visually pleasing edge is ready to display with no further treatment.
- 27% Lighter weight – reduces shipping costs, ease of installation.
- Dent resistant corners – eliminates damage in shipping and handling.
- Superior cutability – cuts with most commercial cutting equipment.
- Moisture Resistant

APPLICATIONS:

- Direct Print Wall Décor
- 3D Signage
- 3D Graphics
